

Personal Details

Title: Prof. C. L. H. (Claudi) Bockting, PhD.
Male/female: Female
Birthdate: 05-05-1969

Main Research Interests

As a professor of Clinical Psychology in Psychiatry at Amsterdam University Medical Centers, my research program focuses on improving interventions for common mental health disorders (such as depression and anxiety), mostly interdisciplinary and in co-creation with patient organisations. I also work as a clinician (clinical psychologist) at the Psychiatry Department. I study potentially modifiable factors of onset, maintenance, recurrence, and chronicity using an interdisciplinary complexity approach. I am a director interdisciplinary Centre for Urban Mental Health (largest research priority area of the University of Amsterdam (UvA) <https://www.uva.nl/en/shared-content/zwaartepunten/en/urban-mental-health/urban-mental-health.html?cb>). As a former fellow at the Institute for Advanced Study (IAS) at the UvA I studied the use of complexity models to explore new targets for prevention, treatment, and relapse prevention of mental disorders. Additionally, as a former fellow at the World Health Organization (WHO), I studied the possibilities of using technology to increase the accessibility of effective psychological interventions worldwide.

My research program focuses on the following issues:

- 1) Understanding etiological and maintenance factors in depression and related common mental health disorders using a complex systems approach.
- 2) Developing innovative multimodal psychological interventions (i.e. combined with technological devices and pharmacological treatments, but also community interventions or interventions via social media) and evaluating the effect in RCT's and micro RCT's (using ecological momentary assessment and affective networks).
- 3) Increasing accessibility of effective psychological interventions in low- and middle-income countries using technology and/or non-specialists.

Teaching

Since 1999 to the present I have taught courses at the faculty of Medicine, at the faculty of Behavioral and Social Sciences (Clinical Psychology), at interdisciplinary courses (Science faculty), and at postdoctoral level for clinical psychologists (to become licensed clinical psychologist). I have

taught, both at the undergraduate, graduate, PhD level and post-doctorate clinical level, including a semester of guest lectures at summer schools.

I am an enthusiastic and dedicated teacher and have experience with curriculum development as well as teaching. Apart from supervising 'bachelor-, and master-theses', I coordinated and have taught in 'Psychopathology and phenomenology', 'Introduction to Cognitive Behavior Therapy (CBT)', 'Diagnostic skills', 'Evidence based treatment', 'Affective disorders', 'Capita Selecta psychological interventions and working mechanisms', interdisciplinary honours- and, research master mental health science courses and in the PhD education program (such as 'Conducting RCT's'). I also teach in the post-doctoral clinical program and was in charge of treatment curriculum for the 'postdoctoral training for licensed clinician GZ opleiding' for 8 years until 2014. Since 2019 I am the head of the postdoctoral clinical training at CCD. This resulted in positive evaluations by students, including receiving a 'teacher of the year award' (2016, postgraduate education Clinical Neuropsychology).

I feel honored that I received, 'the teacher of the year award' in the post-doctoral training in clinical neuropsychology (2016, RINO, Utrecht). In addition, I received with colleagues a teaching innovation award (NWO, University of Groningen, 2013-2015) to develop blended learning for the development and skills training of e-health interventions. I also initiated and co-developed at the department of Clinical Psychology the bin-national international Clinical Master.
